Users' Guide

checkGPA Users' Guide

STEP-TO-STEP GUIDE.

Grade system
- Enter your college grading system. To start enter your college grading letter (GD) which can be A, B, C, D, E, F and grading point (GP) which can also be 5, 4, 3, 2, 1.

Calculate GPA
- Enter your course codes, grades (grading letter) and credit units/credit hours/course units.

History
- Next, after step 1 and step 2 check history and there you will see your GPA.

GRADE SYSTEM   **CALCULATE GPA**   **HISTORY**

HOW IS GPA CALCULATED ?

Most colleges use whats known as:
- A grade system where each grade letter is assigned a grade point. Example grade A can be 5 point while grade B can be 4 point ...
- A credit unit, where each course is assigned one. For example MAT 111 is assigned a credit unit of 3.
  Let us assume this is the grading system of your college

| GRADE	POINT	■
A	5	
B	4	
C	3	
D	2	
F	0	

This means if in MAT 111 you got A and the course has a credit unit of 3. Your total quality unit will be 15 and that using the above table will be 5 x 3 (5 point x 3 unit). This will be repeated depending on the number of courses you will be taking that college semester year. The total sum of the quality units and credit units should be taken.
Finally divide the total quality units by the credit units.
For more information on how to calculate your GPA check, checkGPA - How to Calculate your GPA.

HOW THE TROPHIES ARE AWARDED. 🏆 🥈 🥉

The gold, silver and bronze trophies are awarded based on how exceptional your GPA is:
The highest possible GPA you can get depends on your college highest grading letter. For example using the table above the highest grading letter is A and has a grading point of 5 this means the highest GPA for this college is 5 this will vary depending on the college you are in.

checkGPA Users' Guide

🏆

For the gold trophy, checkGPA will subtract 0.5 from the highest possible GPA of your college. For example using the grading system above 0.5 will be subtracted from 5 giving us 4.5, so the gold trophy will be awarded to anyone with a GPA equal or greater than 4.5.

🏆

For the silver trophy, checkGPA will subtract 1 from the highest possible GPA of your college giving us 4.0, so the silver trophy will be awarded to anyone with a GPA equal or greater than 4.0 but less than 4.5.
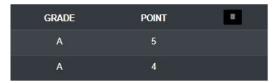

🏆

For the bronze trophy, checkGPA will subtract 1.5 from the highest possible GPA of college giving us 3.5, so the bronze trophy will be awarded to anyone with a GPA equal or greater than 3.5 but less than 4.0.

COLOUR CODE.

Grades	Colour
A A+ A++ A* A** A1	🟩
B B- B2 B3	🟪
C C3 C4 C5 C6	🟧
D D7 D8	🟦
F F9	🟥
Others	🟪

MISTAKES PEOPLE OFTEN MAKE.

- Repeated entries in the grading system. For example repeating the same grading letter more than once with different grading letter, this will not work.

GRADE	POINT	
A	5	
A	4	

❌

- Trying to use a grading letter in the calculate GPA section that has not been given a grading point in the grading system section this will not work.

WHY SHOULD I USE THIS ?

Why should you not:
- Reduces the stress of having to do it with a pen and a calculator.
- The web application keeps the history of your last calculation so you don't have to always repeat the same procedures all the time.
- You can print directly from the history page using command p for Mac and control P for Windows. This is for those that will love to have a copy.
